SEO

DevOps

PROFILE

I am looking for a new opportunity in a fully remote position. I have been working remotely since 2016 and love the lifestyle.

I have proven my ability over the last years to effectively self-manage during independent projects, as well as collaborate in a team setting.

EMPLOYMENT HISTORY

Full Stack Web Developer, Guaranteed SEO

Vancouver / Remote

2015 — Present

Over 7 years I have worked on many different projects. We are a dev team of 2 so most projects I had full input into the structure and technologies used.

Some recent projects that I'm proud of:

- Sales proposal / invoicing CRM tool using Laravel
- Block-based WordPress themes using React / Tailwind
- Web scraping tool for medical compliance using Node / Laravel

I have also been handling all the DevOps for our hosting servers and application servers for the past ~5 years.

Map Artist / Web Developer, GM Johnson Maps

Vancouver

2012 — 2015

I worked as part of a team creating street maps using a variety of custom in-house software. I also developed and managed the company's first ecommerce website.

Self-Employed, Affiliate Marketing

Vancouver

2008 — 2012

After graduating high school I started promoting products and offers from affiliate programs in many different niches. After learning how to market online I moved onto creating my own ebook products and recruiting my own affiliates to sell them for me.
